## 92

# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

## CONTRAST

⚠️   Background and foreground colors do not have a sufficient contrast ratio.    ⌄

These are opportunities to improve the legibility of your content.

## TABLES AND LISTS

⚠️   Lists do not contain only `<li>` elements and script supporting elements (`<script>` and `<template>`).    ⌄

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

## ADDITIONAL ITEMS TO MANUALLY CHECK (10)    Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

## PASSED AUDITS (22)    Show

## NOT APPLICABLE (33)    Show
